# AIRMDR

AirMDR Product Portfolio: World–Class Security Operations Outcomes for Every Team

Fast investigations, clear evidence, and scalable operations powered by the right blend of Agentic AI and Human Expertise

THE CHALLENGE

Scalable, Fast Security Operations

Security teams – enterprise SOCs and MSSPs alike – are crushed by alert volume, 24×7 expectations, and SOAR playbooks that break easily. You need speed, consistency, and proof – without relying on an automation team or rewriting your workflows.

THE SOLUTION

SOC Products that Blend Agentic AI and Human Expertise

An agentic AI SOC platform that automates triage and writes the case – so your analysts can focus on judgment and action.

AI-Powered MDR: 24x7 coverage with human-led, expert oversight that uses our AI SOC platform to deliver world–class security outcomes for your lean team.

AI SOC Platform: agentic AI that automates alert investigation and writes transparent and audit-ready cases and escalates to your experts.

Free AI SOC: production-grade engine savvy SOC teams can use at no cost to experience the power of AI–powered security operations.

Key Outcomes

Scale

Agentic AI triages 90%+ of alerts and automates 80%+ of routine tasks – your existing team focuses on security decision–making

Coverage

Consistent, 24x7 investigations across every alert type – SIEM, EDR/NDR, identity, cloud/SaaS, and email

Speed

High–fidelity cases in <5 minutes with transparent, audit–ready evidence

How it Works

Ingest	Connect alert sources and threat intel via 200+ prebuilt integrations
Detection & Triage	AI analyst reduces noise; identifies and prioritizes likely threats by risk, impact, and business context.
Agentic Investigation	The AI Analyst enriches, correlates, and writes the case with clear rationale. MDR: exception-based case escalations to your team. AI SOC Platform: your team owns escalation
Respond	Transparent, auditable cases with recommended next steps. MDR: one-click actions where approved
Learn & Improve	Incorporates natural-language feedback to refine investigations – governed and auditable.
