AIRMDR

AirMDR Product Portfolio: Agentic Managed Detection and Response

Plus Free Tools to Experience Agentic Investigations

Every alert investigated. Every case backed by evidence. Every outcome clear enough to inspect, understand, and act on.

THE CHALLENGE

Black Box MDR You Can't Verify

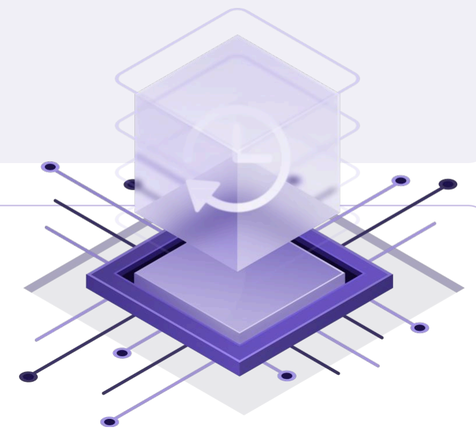
Traditional MDRs are costly black boxes – teams receive tickets and verdicts, but can't verify whether alerts were thoroughly investigated or conclusions were sound. Meanwhile, alert volumes keep growing: more tools, more noise, coverage gaps outside business hours, and SLAs that slip. The result is a service you're paying for but can't inspect.

THE SOLUTION

Agentic MDR That Shows Its Work

AirMDR's agentic AI investigates every alert across your existing tools and generates a transparent, evidence-backed case – with confirmed threats and low-confidence cases escalated to human experts for review and action.

Agentic MDR	24x7 agentic AI investigations with human expert oversight – every alert investigated, every case documented, every outcome inspectable.
AirMDR FAST	A free, self-serve tool that lets lean teams experience agentic alert triage without engaging sales.
SOC Grader	A free tool that uses agentic AI to evaluate and grade your current investigation quality – so you can see the problem before you solve it.



Key Outcomes

Scale

Agentic AI investigates 100% of alerts, so your team can focus on confirmed threats and high-impact decisions.

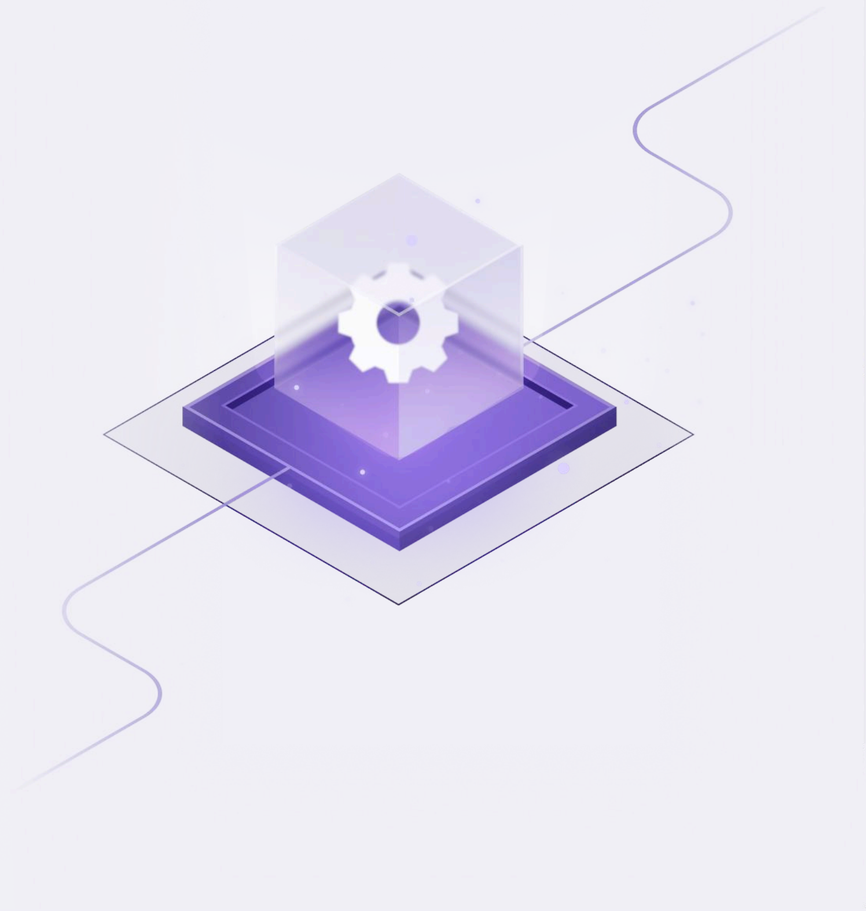
Coverage

Consistent, 24x7 investigations across every alert type – SIEM, EDR/NDR, identity, cloud/SaaS, and email.

Speed

95% of investigations completed in under five minutes, with transparent, evidence-backed cases ready for audit and escalation.

How it Works



Ingest	Connect alert sources and threat intel via 200+ prebuilt integrations.
Detection & Triage	Agentic AI triages every alert, enriches with context from connected tools, and prioritizes by risk, impact, and business context.
Agentic Investigation	Agentic AI reasons across gathered evidence, reaches a disposition – benign, suspicious, or confirmed threat – and generates a documented case. Confirmed threats and low-confidence cases escalate to human experts; routine cases are closed according to policy.
Respond	Transparent, evidence-backed cases document what happened, what was reviewed, what was concluded, and what action should follow. MDR: one-click actions where approved.
Learn & Improve	Incorporates natural-language feedback to refine investigations – governed and auditable.

AirMDR Solution	What It Delivers	Best For	Key details
AI MDR	24x7 agentic AI investigations with human expert oversight – every alert investigated, every case documented and inspectable.	Lean security teams needing managed coverage without building a SOC.	200+ integrations; 95% of cases in under 5 min; human-accountable outcomes.
FAST	Free, self-serve agentic alert triage – experience the investigation quality before you buy.	Teams exploring AI security operations investigations.	No sales engagement required; connect and run immediately.
SOC Grader	Free agentic AI tool that grades your current investigation quality – so you can see what good looks like.	Teams unsatisfied with their current MDR or investigation quality, but not sure why.	Works with any case write-up.

Get Started

Start with SOC Grader to assess your current investigation quality, try FAST to experience Agentic investigation quality for free – then talk to us about Agentic MDR coverage for your team.
